APPENDICES—

Statement A—Showing the number of Civil Hospitals and Dispensaries .. 13

,, B—Showing the In-door and Out-door Patients treated in the State-Public, Local and Municipal Fund and Private-aided Hospitals and Dispensaries 14–89

,, C—Showing the Diseases of the In-door and Out-door Patients treated in the State-Public, Local and Municipal Fund, Private-aided, State Special, Railway and Private-non-aided Hospitals and Dispensaries 90–103

,, D—Showing the Infectious Diseases (and including malignant growths, opium poisoning and beri-beri) both in-door and out-door treated in the State-Public, Local and Municipal Fund, Private-aided, State Special, Railway and Private non-aided Hospitals and Dispensaries 104–111

,, E—Showing the Classes and Sexes of the Patients treated in the State-Public, Local and Municipal Fund and Private-aided Hospitals and Dispensaries 112–113

,, F—Showing the Surgical Operations performed in the State-Public, Local and Municipal Fund and Private-aided Hospitals and Dispensaries 114–145

,, G—Showing the Income and Expenditure of the State-Public, Local and Municipal Fund and Private-aided Hospitals and Dispensaries 146–213

,, H—Showing the account of Invested Capital of the State-Public, Local and Municipal Fund and Private-aided Hospitals and Dispensaries 214–217

Supplementary statement showing Venereal Diseases of In-door and Out-door Patients by sexes, treated in the Hospitals and Dispensaries .. 218–219

Table showing the strength and distribution of the Medical and Health Services including trained Midwives and Nurses for rural and urban areas in the Bombay Presidency 220–221

No. P. 9-B of 1933.

OFFICE OF THE SURGEON-GENERAL
WITH THE GOVERNMENT OF BOMBAY :

Poona, 1st March 1933.

From

Major-General W. H. C. FORSTER, C.I.E., I.M.S.,
Surgeon-General with the Government of Bombay, Poona ;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Subject.—Report on Civil Hospitals and Dispensaries for the triennium ending 1929–31.

Sir,

I have the honour to submit for the information of Government the Report on Civil Hospitals and Dispensaries for the triennium 1929–31.

Buildings.

2. The extension of the Sir Cowasjee Jehangir Ophthalmic Hospital, the foundation stone of which was laid on 20th November 1928 by His Excellency the Governor of Bombay was completed during the triennium.

This extension provides beds of modern hospital type and an additional up-to-date Operating Theatre. The new building has been taken into service but financial conditions do not, as yet, permit of the full bed accommodation being utilised.

The Sir Sassoon David Hospital (Pavillion No. 1) was completed but has not been taken into service and the same applies to the Sir C. E. Memorial Dental School and Hospital.

No other works of importance were taken in hand or completed during the Triennium.

Bombay Town Hospitals.

3. Financial stringency which manifested itself early in the Triennium reacted adversely on the scheme for increasing the bed accommodation of Government Hospitals by 486 beds. The actual buildings had been completed and in the J. J. Group of Hospitals alone 192 extra beds had been taken into service when financial conditions called for urgent revision of the scheme. It was then found necessary to postpone

indefinitely the opening of the beds not yet taken into service and of the 192 in service to close down all except 50 beds in the B. J. Children's Hospital. In the G. T. Hospital and the Cama and Albless Hospitals it was also necessary to close down all the recent extensions. Further as it was found necessary to impose a 10 per cent. cut on the Diet and Medicine grant to all Hospitals the Bombay Town Hospitals were proportionately affected.

For a time the position appeared to be one of unrelieved gloom but, as often happens, the period of adversity has been productive of much good.

In the first place the position of Provincial Revenues *vis-a-vis* the Bombay Town Hospitals has been submitted to critical analysis with the result that Provincial Revenues in all probability will not be debited with the cost of medical relief in the Bombay Urban area to the same extent as formerly.

In the second place at the request of the Superintendent of the J. J. Hospital a new post—that of Lay Secretary to the J. J. Group of Hospitals- was temporarily created, an appointment which permitted of continuous expert examination of the lay administration of the Group with a view to more economical working. The innovation was at first unpopular but as a very senior, tactful, and experienced officer of the R. A. S. C., well versed in the practical details of the lay side of hospital administration, was appointed the Medical staff generally came to appreciate at its true worth the value of such expert assistance in hospital working. With the co-operation of all parties very considerable economies were effected and stabilised. As the value of the scheme became evident the scope of the Lay Secretary's activities was extended to include all the Government Hospitals in Bombay and it seems probable that the ultimate economies effected by this appointment will greatly exceed even the most sanguine estimates.

Finally, support from Provincial Revenues being limited in future it became necessary to devise some mechanism whereby the general public of Bombay could be invited to assist the Hospitals. In the mofussil, as will be explained later, the method adopted was for each Hospital to raise its own "Hospital Fund" but in the case of the Bombay Hospitals certain of them declared their inability to raise such a Fund. The reasons adduced were not very convincing and in the case of the two Hospitals which undertook to raise such a Fund the results were all that could be desired but in the end it was decided that a body to be styled—The Bombay Hospitals Maintenance Committee—composed of prominent citizens and Government officials should be created and entrusted with the task of collecting funds to be divided equally between the Government and Municipal Hospitals. So far as the Government Hospitals were concerned it was decided that funds received from the Committee should first be applied to making good deficiencies in the Diet and Medicine grant and after that to the re-opening of the beds closed under financial stress. Thanks to the generosity of the Turf Club, which body arranged a special Race Day in aid of the Hospitals, the Committee were enabled

to place at the disposal of the Government Hospitals a sum sufficient to meet the deficiencies in the Diet and Medicine grant and permit the re opening of 16 beds. These re-opened beds are in a somewhat precarious position as failure of contributions would necessitate closing them again but at present nothing more can be done in the matter. The catastrophic fall in the price of primary commodities inimical as it was to the general welfare nevertheless tempered the wind to the shorn Hospital lamb and in conjunction with more economical management played no small part in the genesis of the feeling of optimism which marked the close of the triennium.

The Hospital Fund.

4. A 10 per cent. cut of the Diets and Medicines grant of the Mofussil Hospitals being necessitated by financial conditions it was decided to open for all District Headquarters Hospitals a Hospital Fund the primary object of which would be to offset the cut. In nearly all cases these Hospitals relieve Municipalities of the cost of diets and medicines for local indigent patients and it was considered reasonable that local charity rather than Provincial Revenues should be called on to relieve these unfortunates. The idea was taken up readily by Civil Surgeons, the local Civil Administrative Officers, and the general public, and though the response was not equal in all Districts yet in the end the total of the Funds collected by all the hospitals was more than sufficient to offset the cut. A further step in popularising the Fund was taken by making the Superintendent of the Hospital the responsible disbursing authority and the Surgeon-General the supreme auditing authority. As the rules at present stand the Fund can only be expended on objects coming within the scope of the Diets and Medicines grant but even so it has proved of incalculable value to Hospitals suffering for years from inadequate provision for the purchase, replacement, and repair of instruments. Members of the general public interested in Hospital Finance have seen for themselves the beneficial result of such a Fund and with a little judicious management there can be no question of the extension as well as continuance of local support.

Hospital Fees.

5. In India where Medical relief by means of a hospital organisation is a State charity it is inevitable that the number of persons able to pay something for medical relief but who seek gratuitous aid from Hospitals should be considerable. There is in existence an elaborate system of rules for Hospital Fees which however is unworkable except in the case of a small proportion of those seeking Hospital relief. It was therefore decided to levy a fee of one anna in the case of out-patients and two annas per diem in the case of in-patients on all persons not known definitely to come under the Hospital Fees Rules. In order to prevent hardship the Medical Officer was invested with absolute power to remit the fee whenever he considered the circumstances of the patient called for such remission. The effect of this levy is interesting. It has not affected the numbers of indoor patients but attendance at the out-patient Departments has fallen considerably even when allowance is made for admittedly healthier conditions. Quite a number of people were in the habit of using the

outdoor department as a sort of club and this class of patient has ceased to attend. Others quite able to afford to pay a doctor for advice have decided to pay more than one anna and get regular professional advice ; and others go to Dispensaries and Hospitals where no charge is made. In the class of patient for whom the Hospital is primarily intended there has been practically no reduction the power given to the Medical Officers to remit the fee being now well-known. The position of the Medical Officer is admittedly difficult, but as usual Medical Officers have more than justified the trust reposed in them by administering the new rule without causing hardship on the one hand or prejudicing the interests of the State on the other. The scheme is at present in its infancy but so far as Government Hospitals are concerned it promises very substantial aid to Hospital Finance. In the case of some non-official hospitals the institution of a similar scheme has enabled them to tide over a very serious crisis.

Hospital Nursing and Training.

6. The Government of Bombay is exceptionally fortunate inasmuch as it is relieved of rather less than half the total cost of nursing in its Hospitals by means of Nursing Associations formed in connection with individual Hospitals. There are twenty-one such Associations in the Presidency and though the arrangements differ in certain cases the general rule is that Government pays half the expenditure of each Association on agreed items up to an agreed maximum. These Associations are affiliated to a body styled " The Bombay Presidency Nursing Association " the Council of which is largely elected by the constituent Associations. The Council prescribes the curriculum for qualifications in General and other classes of Nursing, conducts the examinations, awards the diplomas, and maintains a register of all persons qualified by it. Amongst other duties the Council maintains a Nurses' Provident Fund and no Nursing Association is recognised by the Council which does not accept the rules with regard to the Fund. It has been proposed to replace the Council of the Presidency Nursing Association by a Statutory Body analogous to the Medical Council and in course of time such a step may become necessary but at present it is difficult to see what advantage would accrue from the change.

Medical Relief in General.

7. Regarded as a hospital organisation in Urban areas the scheme of medical relief obtaining in the Presidency can safely stand comparison with that obtaining in any other Province but even in Urban areas certain defects in the system are becoming apparent. All existing Hospitals are designed both from the structural and Administrative aspects as General Hospitals but by the nature of the case they also have to function as Infirmaries, Homes for Incurables, etc. It is financially impossible to extend medical relief by means of such costly institutions as General Hospitals to the class of patient elsewhere provided for by the Infirmary, the Home for Incurables, etc., and so, perforce, our hospitals will continue to suffer from overcrowding with the wrong class of patient until the necessity for distinguishing between various classes of Hospitals is officially recognised.

With regard to the Rural Areas it must be admitted that the Presidency has lagged far behind other Provinces in the matter of medical relief. In 1924 a scheme was introduced whereby schoolmasters in certain selected areas were given a "First Aid" course at a General Hospital and thereafter provided with simple outfits with which to put into practice what they had learnt; here and there some district work is undertaken by the Red Cross or similar Associations; but in general the rural population are dependent on Dispensaries situated in Urban Areas and often at considerable distances. It is a common experience to meet in the outdoor department of a Dispensary men who have come from villages many miles away, each with a list of sick people and their statements as to what they considered to be their most prominent or urgent symptoms, waiting to take back with them a consignment of bottles, pills, powders, etc., containing such drugs as the Medical Officer, on the information thus given him, may think most suitable. This outstanding defect in our medical organisation requires mention and emphasis but this is not the place for constructive suggestions.

Anti-Rabic Treatment.

8. In the Presidency provision for Anti-rabic treatment has been designed and carried out on sound lines. The Haffkine Institute functions as the manufacturing laboratory and the official treatment centre for Bombay Town but treatment centres to which the Vaccine may be sent can be established anywhere; at most of the District Headquarters Hospitals such centres have been established.

Medical Colleges and Schools.

9. The Grant Medical College, Bombay, the oldest centre of medical education in the Presidency and the only Government Medical College, concluded the triennium with 488 regular students on its rolls. At the beginning of the Triennium some dissatisfaction was expressed with the scheme for leying "economic rent" on the quarters in the Students' Hostel and for a time the Hostel was vacated in protest. The matter was amicably settled without any great difficulty and it is satisfactory to be able to report that during the whole of the period of political turmoil in Bombay not a single student absented himself from duties involving care of and/or attention to the sick.

There are three Medical Schools at Poona, Ahmedabad and Hyderabad (Sind) respectively and these at the close of the triennium had 585 students on their rolls as compared with 412 at the close of the last triennium.

The popularity of these Medical Schools is such that it has been found possible to considerably enhance the fees for tuition without any appreciable reduction in the number of applicants for admission. This popularity depends on the fact that the Schools provide in a reasonable time and at a reasonable cost a Medical Education leading to a qualification by which the holder can hope to earn a reasonable livelihood; but early in the Triennium difficulties arose. In contradistinction to all other Provinces the Minor Medical Qualification, the Qualification for

which Medical Schools as opposed to Medical Colleges prepare candidates, is granted by a non-official body styled " The College of Physicians and Surgeons, Bombay ". The Government Medical Schools are affiliated to this body which had intimated its intention of raising the duration of the curriculum for its qualification from 4 years to 5 years and effecting certain detail alterations in the curriculum. Government being unable to accept the extension of and detail alterations in the curriculum the question of disaffiliating its Medical Schools and instituting a State Medical Faculty for the grant of the Minor Medical Qualification became urgent. After an interchange of views the College decided to suspend for 6 years the introduction of the revised curriculum and the matter has been temporarily shelved. Apart from any question of revision of the curriculum it must be recognised that for teaching the non-clinical subjects these Schools will require to be considerably improved both in personnel and equipment as soon as financial conditions permit.

Non-official Societies.

9 (*a*). The fissiparous tendency of non-official effort in the field of medical relief is amply demonstrated by the multiplicity of Societies or Associations which have come into existence for the purpose of such relief. Apart from the Red Cross we have for example, Societies or Associations concerning themselves with Infant Welfare, Baby Weeks, Leprosy, Blindness, Social Hygiene, etc., etc. The very wise suggestion promulgated from headquater that these various activities could be correlated most advantageously by the Red Cross has not yet found favour locally although some amalgamation of effort would be conducive to general efficiency. So far as this Department is concerned the most important piece of work effected by these benevolent societies during the triennium is the provision of a Maternity Ward—complete with recurring charges accepted—at the Dharwar Civil Hospital by the Red Cross Association.

The Mental Hospitals, The Haffkine Institute and the Chemical Analyser's Laboratory, etc.

10. A separate report is published annually with regard to the Mental Hospitals, the Haffkine Institute and the Chemical Analyser's Laboratory. No special mention has, therefore, been made about the activities of these institutions in this report.

Statistical Statements. Statement A.

11. The total number of institutions opened at the beginning of the triennium was 666. During the triennium twenty-four new Dispensaries were opened and fifteen were closed, leaving 675 institutions actually at work at the end of the period.

Statement B.

12. The total number of patients treated during the year 1931 was 40,08,064 as compared with 38,14,816 in 1930 and 39,16,354 in 1929. The mean number treated during the triennium was 39,13,078 against 34,23,408 in the previous triennium, showing an increase of 14·3 per cent. over the latter period. The increase was contributed by indoor as well as outdoor patients. The in-patients numbered 1,10,628 in 1931 against 1,12,564 in 1930 and 1,07,092 in 1929. The average number of in-patients treated during

1929–31 was 1,10,095 against 92,237 during 1926–28. The number of out-patients was 3,897,436 in 1931, 37,02,252 in 1930 and 38,09,262 in 1929 with an average of 38,02,983 against 33,31,171 in the preceding triennium.

The number of women patients treated in the general Hospitals and Dispensaries in the year 1931 was 8,88,780 against 8,41,582 in 1930 and 8,60,279 in 1929 and the average attendance of such patients in these institutions in the triennium was 8,63,547 as compared with 6,68,781 in the preceding triennium. These figures show the growing popularity of the general and female hospitals and dispensaries among women. The number of women doctors at present employed in Government Hospitals in the Presidency is three Bombay Medical Service and ten Subordinate Medical Service Officers.

The mean daily average attendance of indoor and outdoor patients for the triennium was 4,994·0 and 36,451·3 respectively against 4,376·5 and 32,209·0 for 1926–28.

The average number of in-patients cured during the triennium was 66,814 against 55,214 in 1926–28. The average mortality for the period was 7,396 against 6,504 in 1926–28. The ratio of deaths to the total treated as in-patients was 6·7 as compared with 7·1 for the previous triennium.

The number of beds available was 7,280 in 1931 as compared with 7,351 in 1928. The small decrease was mainly due to the closing of some of the beds in the Bombay Hospitals.

13. The following tables show the principal diseases among the indoor and outdoor patients treated in the State Public, Local Fund and Municipal and Private Aided Institutions during the triennium and the mortality among in-patients:—

Statement C.

		1929.		1930.	
		Cases.	Death.	Cases.	Death.
Cholera	Indoor	56	22	209	84
	Outdoor	2,556	..	2,101	..

Small-pox ..	Indoor ..	83	9	1,087	209	674	135
	Outdoor ..	372	..	572	..	835	..
Tubercle of the Lung.	Indoor ..	3,498	1,005	3,044	889	2,851	819
	Outdoor ..	10,063	..	9,498	..	8,756	..
Other Tubercular Diseases.	Indoor ..	1,383	114	1,829	192	1,744	177
	Outdoor ..	6,895	..	6,669	..	7,009	..
Labour cases ..	Indoor ..	15,737	139	13,998	144	9,968	118
	Outdoor ..	5,928	..	4,589	..	3,381	..
Injuries (Local and General).	Indoor ..	12,849	649	13,817	834	12,103	735
	Outdoor ..	2,98,957	..	2,96,310	..	2,59,654	..

Cholera. The total number of cholera cases treated during the year was 3,489 against 2,310 in 1930 and 2,612 in 1929 and the mean number of the triennium was 2,803 against 1,537 in 1926–1928.

Leprosy. The number of indoor and outdoor cases admitted and treated during the year 1931 was 3,339 as compared with 2,813 in 1930 and 2,663 in 1929, the mean number for the triennium being 2,938 against 2,598 in 1926–28. Broadly the policy of Government with regard to Leper Asylums is to collaborate with the British Empire Leprosy Relief Association (Indian Council), Bombay Branch, in the establishment of outdoor clinics and in propaganda work and in aiding the Mission to Lepers or others to establish a sufficient number of Leper Asylums so that the Lepers' Act may be applied to the whole of the Bombay Presidency. Municipal Acts enjoin

upon Municipalities to make payments out of Municipal funds for the maintenance and treatment of lepers from their area and the question of fixing the rates at which the Municipalities should make such payments is at present under the consideration of Government.

Malaria.

During the triennium under report Malaria was prevalent all over the Presidency. The average admissions for 1929–31 numbered 7,53,666, as compared with 6,39,964 in 1926–28, an increase of 17·7 per cent. over the previous triennium. In Bombay City a Committee has been appointed for carrying out the anti-malarial scheme recommended by Major G. Covell, M.D., D.T.M. & S., I.M.S., who was appointed by Government in 1928 to inquire into the Malarial conditions in the City and all the anti-malarial operations in the Island are now entrusted to the direct supervision and control of the special Malaria Officer of the Bombay Municipality. In the Mofussil 28 S. M. S. Officers were deputed in the year 1931 for anti-malarial work in the Presidency in the districts afflicted with Malaria. The number of S. M. S. Officers so deputed in the year 1930 was 34 and the number deputed in the year 1929 was 38. The control over the S. M. S. Officers employed on anti-malarial duty has now been transferred to the Director of Public Health with the object of enabling the Director to combine these Medical Officers into a Joint Service with the Medical Officers employed on inoculation duty who are already under his control.

Small-pox.

The total number of indoor and outdoor cases of Small-pox treated during the year was 455 against 2,551 in 1930 and 1,971 in 1929. The number of such cases treated in the hospitals and dispensaries in Bombay City during the year 1931 was only 179 as compared with 1,463 in 1930 and 1,176 in 1929. The decrease in the total number of patients during the year 1931 was therefore mainly due to there being no Small-pox cases in Bombay City.

Tuberculosis.

The total number of admissions for Tuberculosis was 63,121 with 3,244 deaths during the triennium as compared with 61,078 with 2,986 deaths in 1926–28.

Labour cases.

The number of cases (indoor) admitted during the triennium was 41,994 against 29,905 in the previous triennium.

Police, Canals, Forests and other State Special Institutions.

The attendance was 44,713 in 1931 as compared with 49,744 in 1930 and 49,167 in 1929. The average attendance during the triennium under review was 47,875 as compared with 51,886 in 1926–28.

The total number of patients treated at Railway Hospitals and Dispensaries during the year 1931 was 3,95,790 against 3,90,292 in 1930 and 4,41,792 in 1929, the average for the triennium being 4,09,291 against 3,19,901 in 1926–28.

The total number of patients treated at private non-aided institutions during the year 1931 was 11,10,918 as compared with 10,82,664 in 1930 and 10,34,218 in 1929. The average number for the triennium was 10,75,933 against 8,47,742 in 1926–28.

14. Of the patients treated during 1931, 26,129 were Europeans or Anglo-Indians ; 25,16,594 were Hindus ; 12,78,669 Mussalmans and 1,86,672 belonged to other classes. There were on an average 26,596 Europeans or Anglo-Indians treated per year against 21,983 ; 24,46,949 Hindus against 21,28,947 ; 12,52,596 Mussalmans against 10,96,857 and 1,86,937 other classes against 1,75,621 in 1926–28.

Statement E.

15. During the year (1931) 1,47,933 surgical operations were performed on 1,46,135 persons with a mortality of 0·5 per cent. The mean number of surgical operations performed during the triennium was 1,39,519 against 1,44,709 in the previous triennium. The average number of persons operated on during the period was 1,38,439 with a mortality of 0·5 as compared with 1,43,335 with a mortality of 0·4 per cent. in 1926–28.

Statement F.

There were 1,381 operations for removal of tumors and cysts with 11 deaths in 1931 against 1,304 with 17 deaths in 1930 and 2,247 with 10 deaths in 1929. The mean number of these operations was 1,644 with 13 deaths per annum against 1,546 with 16 deaths in 1926–28.

Amputations numbered 594 with 43 deaths as compared with 770 with 39 deaths in 1930 and 774 with 65 deaths in 1929. On an average 713 amputations were performed per annum with 49 deaths against 803 with 31 deaths in 1926–28.

Operations on the eye numbered 7,186 of which 2,076 were for extraction of lens for cataract against 5,141 in 1930 and 7,434 in 1929. The average number of eye operations for the triennium was 6,587 against 9,340 in 1926–28.

Vesical Calculi were removed by Litholapaxi and Lithotrity in 1,156 cases with 21 deaths against 1,244 with 17 deaths in 1930 and 1,347 with 36 deaths in 1929. Lithotomy was resorted to in 176 cases with 19 deaths against 192 with 25 deaths in 1930 and 235 with 22 deaths in 1929. The average number of operations for the removal of stone for the triennium was 1,450 per annum with 47 deaths as compared with 1,268 with 39 deaths in 1926–28.

Abdominal operations other than those for diseases peculiar to women numbered 2,300 with 201 deaths against 1,770 with 155 deaths in 1930 and 1,670 with 217 deaths in 1929 while for diseases peculiar to women the numbers were 240 with 14 deaths as compared with 191 with 14 deaths in 1930 and 163 with 4 deaths in 1929. The average number of operations of the former class for the triennium was 1,913 per annum with 191 deaths against 1,811 with 166 deaths for 1926–28, and that of the latter class was 198 with 11 deaths against 336 with 14 deaths in the preceding triennium.

Operations for Hernia numbered 930 with 26 deaths in 1931 as compared with 770 with 33 deaths in 1930 and 684 with 45 deaths in 1929. The mean number for the triennium was 795 with 35 deaths as compared with 619 with 34 deaths in 1926–28.

Operations for abscess of liver numbered 111 with 9 deaths against 122 with 16 deaths in 1930 and 79 with 30 deaths in 1929. The average number of these operations was 104 per annum with 18 deaths as compared with 157 with 22 deaths for the previous triennium.

Obstetric operations numbered 1,844 with 72 deaths against 1,418 with 54 deaths in 1930 and 1,148 with 41 deaths in 1929. The average number of Obstetric operations for the triennium was 1,470 per annum with 56 deaths as compared with 1,521 with 44 deaths in 1926–28.

Operations for conditions peculiar to women other than Obstetric and abdominal numbered 1,301 with 14 deaths against 1,053 with 9 deaths in 1930 and 891 with 4 deaths in 1929. The average number of these operations for the triennial period was 1,082 with 9 deaths as compared with 1,505 with 10 deaths in 1926–28.

16. The total receipts inclusive of cash balance amounted to Rs. 61,83,481 in 1931 as compared with Rs. 68,81,856 in 1930 and Rs. 74,28,609 in 1929. The apparent decrease in the receipts for the year 1931 as compared with those for 1930 is attributable mainly to the inclusion in the Government contribution (column 5) and miscellaneous receipts (column 11) of the amount of Rs. 3,70,089 on account of the cost of new buildings and extensions at the J. J. and Sir C. J. Ophthalmic Hospitals adjusted against these institutions during the year 1930 as compared with only Rs. 31,788 adjusted during 1931 by the Public Works Department (*vide* columns 21 and 22 of the expenditure side). This also accounts for the decrease in the expenditue for the year 1931 as compared with that for 1930 shown in the sub-paragraph below. Of the total receipts for 1931 Rs. 5,41,895 were contributed by local boards; Rs. 16,00,197 by Municipalities and Rs. 30,01,228 by Government. The interest on invested capital amounted to Rs. 76,928. Miscellaneous receipts amount to Rs. 5,86,361 of which Rs. 2,10,952 were contributed by the several Nursing Associations.

Statement G.

The total expenditure amounted to Rs. 59,08,003 as compared with Rs. 66,11,818 in 1930 and Rs. 71,57,346 in 1929. Deducting from this Rs. 2,33,015 remitted into the Treasury in the case of Government Hospitals or credited to Dispensary Funds in the case of Dispensaries on account of Hospital Fees, sale proceeds of unserviceable articles, etc., and Rs. 37,472 invested during the year the net expenditure for 1931 was Rs. 56,37,516. The average cost of each diet was Re. 0-5-6.

The average income for the triennium was Rs. 68,31,315 against Rs. 64,72,246 in 1926–28. The average annual expenditure for the period amounted to Rs. 65,59,056 (of which Rs. 32,88,362 were contributed by Government and Rs. 21,72,689 by Local and Municipal Funds) as compared with Rs. 61,41,367 in 1926–28. The mean percentage of the cost borne by Government was 50·1 against 54·4 in 1926–28. The average cost per patient during the triennium was Re. 1-10-9 against Re. 1-12-7 in the previous triennium.

17. On the first of January 1931 the invested capital stood at Rs. 17,52,666. During the year Rs. 37,472 were invested and securities worth Rs. 2,947 were withdrawn, leaving the total invested capital at the end of the year at Rs. 17,87,191.

Statement H.

18. The total number of Medical Officers employed in State Public, State Special, Local and Municipal Fund and Private-aided institutions during the year 1931 was 625. Out of this number 165 were employed in rural area and 460 in Urban area. Similarly the total number of Health Officers including Sanitary Inspectors during the year in the Health Department was 126. Out of these 5 were employed in rural and 121 in Urban area. The total strength of Nurses and Midwives in Medical as well as in Health Department was 558 out of which 49 were in rural and 510 in Urban area.

Statement of Medical and Health Services and Trained Midwives and Nurses.

19. Bombay Medical Service has recently been reorganised into Class I and II. The former includes the posts relinquished by the Indian Medical Service and other superior appointments and the latter comprises all the posts which are now already in the Bombay Medical Service.

Personnel.

With these remarks I submit this Triennial Report for the approval of Government and request that Government will be pleased to accord their approval to it and permit its publication as early as possible.

I have the honour to be,
Sir,
Your most obedient servant,

W. H. C. FORSTER,
Major-General, I.M.S.,
Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1931.

(Total population of the Province—26,757,648.)

Class of Civil Hospital and Dispensary.	Number open on 31st December 1930.		Number opened during the year 1931.		Number closed during the year 1931.		Number transferred to other department or class.		Number open on the last day of the year 1931.		Remarks.
	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	
1	2	3	4	5	6	7	8	9	10	11	12
I. State—Public ..	4	49	..	..	..		..	..	4	49	
II. State—Special—											
(i) Police ..	1	3	..	..	..	..	..	..	1	3	
(ii) Forest and surveys..	2	..	..	..	..	..	..	..	2	..	
(iii) Canals ..	2	..	..	..	(a)1	..	..	..	1	..	(a) One closed in Satara District.
(iv) Others ..	5	6	..	..	(b)1	..	..	..	4	6	(b) One closed in Thana District.
III. Local and Municipal Funds.	145	195	..	(c)3	..	..	..	..	145	198	(c) One in Bombay City, one in Nawabshair and one in Sukkur District.
IV. Private—Aided ..	6	12	..	..	..	..	..	..	6	12	
V. Private—Non-aided ..	144	29	(d)1	(d)5	..	..	..	..	145	34	(d) Three in Surat District, two in Ahmedabad District and one in Revakantha Agency.
VI. Railways ..	21	44	..	..	..	..	..	..	21	44	
Total for the Province ..	330	338	1	8	2	..	..	..	329	346	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as "State" when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—"Public" are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution, is aided by private subscriptions or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries whether maintained by State railways or others.
